

Ahead of time

GOFER2.2

WHAT IS GOFER

GOFER is designed to streamline and manage the random and recurring corporate passenger transport process. Vehicle requests by company staff will be managed and vehicles can be assigned optimally. Driver or vehicle payments will be prepared based on requests automatically for ease of preparation and accuracy. User roles are designed to enable organization to be able to customize system as per their precise requirements.

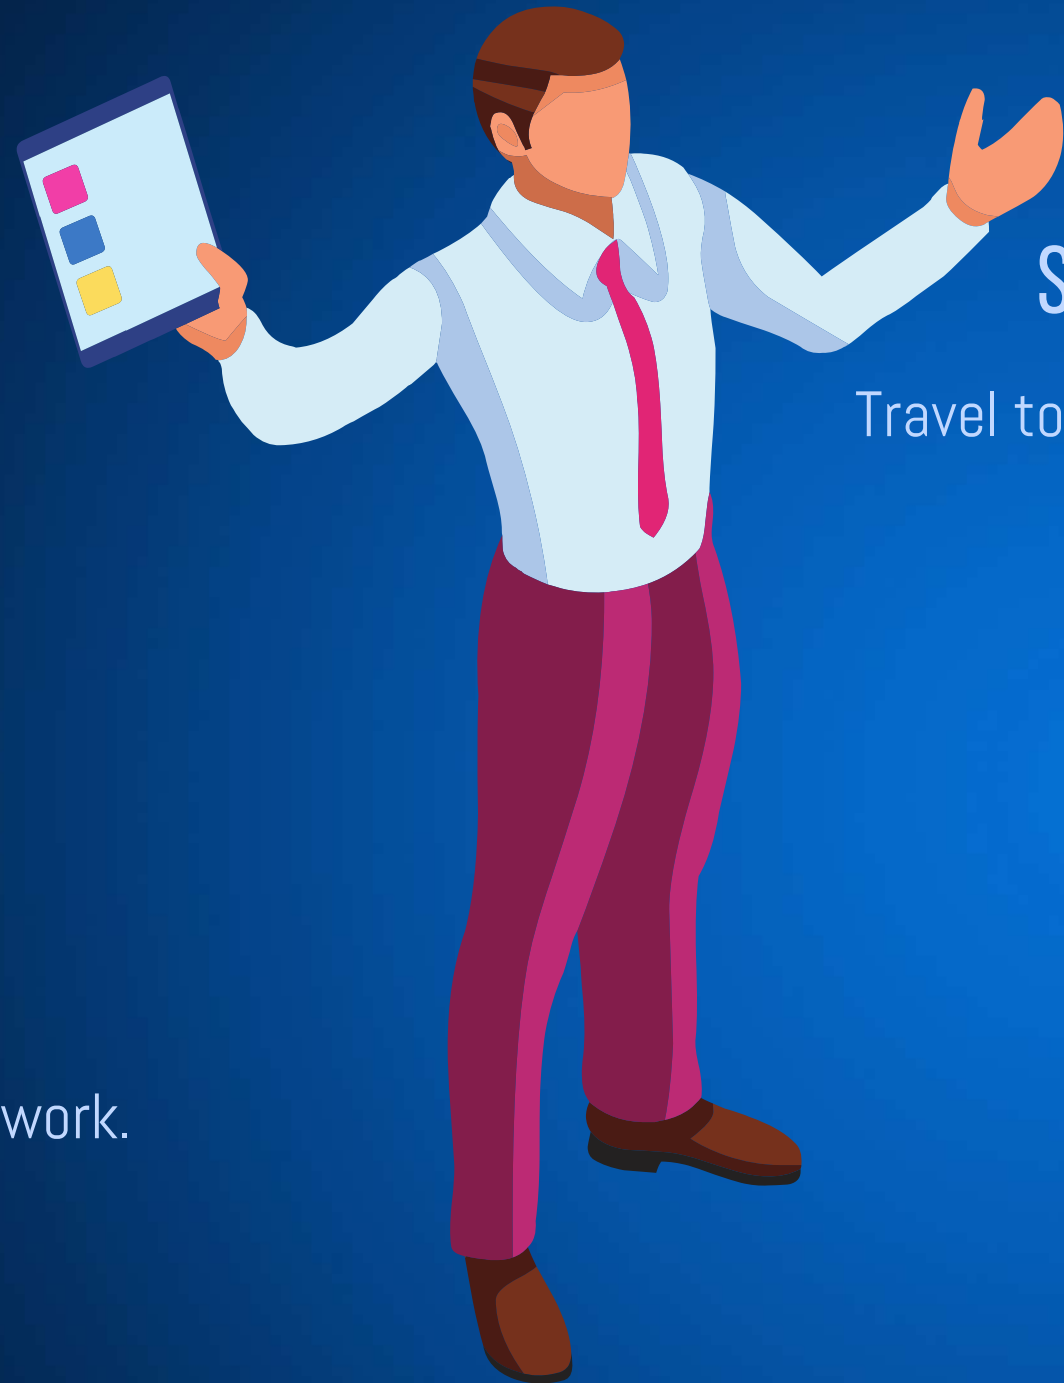

GOFER offers its users processed data on employees' business rides and Uber-like features for car booking and rides management. Imagine Uber tailored to your passenger transport fleet. Well, that's GOFER!

TRANSPORTING PEOPLE WHO MAKE ANY BUSINESS HAPPEN

STAFF

Commuting to and from work.

SALES STAFF

Travel to clients and suppliers.

INSTALLERS

Collect, replace, maintain, and install equipment across the region.

MANAGERS

Visit big corporate clients.

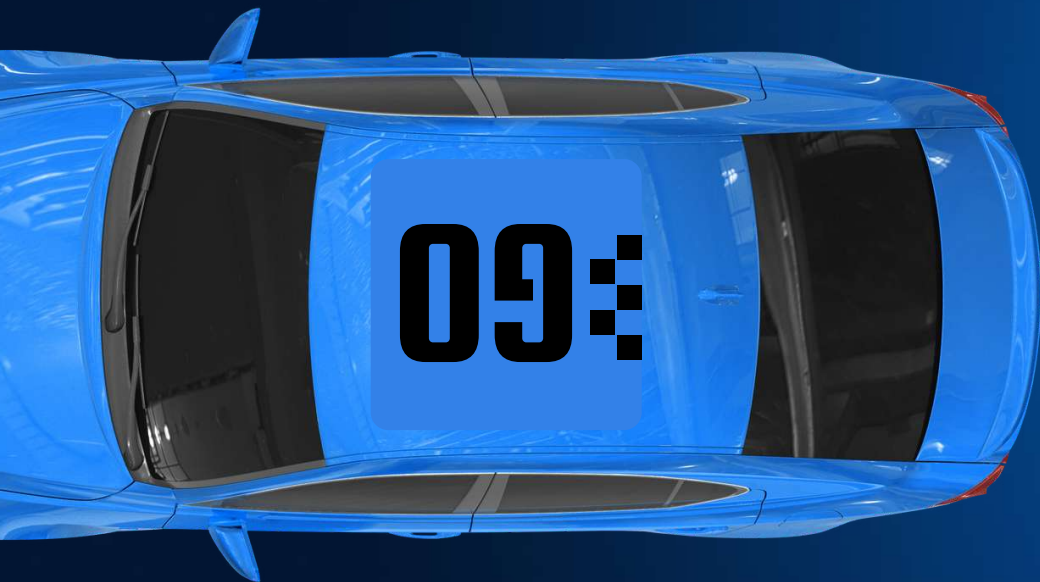

HOW GOFER WORKS?

PASSENGER REQUESTS

DRIVER ACCEPTS AND COMPLETES TRIPS

MANAGER APPROVES

DISPATCHER ASSIGNS VEHICLES

HOW GOFER SAVES YOUR MONEY

SHARING

Share vehicles between employees going in one direction with multi-point feature.

COST PER PASSENGER

GOFER shows how much each employee costs for a company and detects misusers/over-users.

DRIVER PAYMENTS

Pay drivers per miles and trips. Reward actual work and stop paying for idling, and segments of private detours during business trips.

HOW GOFER SAVES YOUR TIME

SIMPLE VEHICLE BOOKING

One-click car booking. No need for phone calls, log books, and emails.

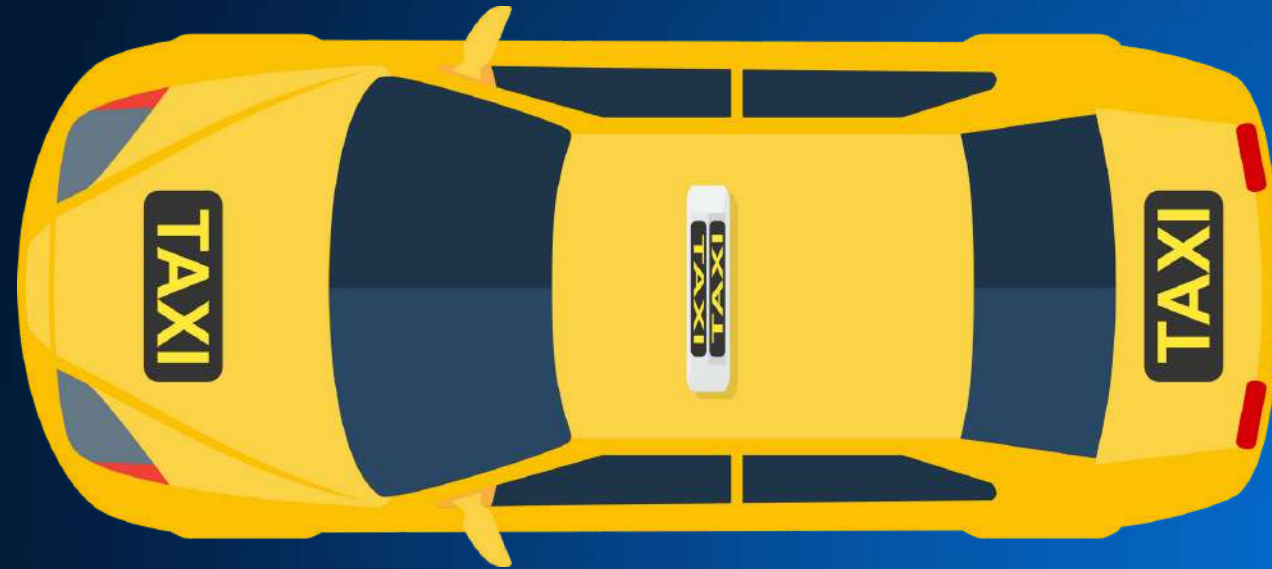

NO PAPERWORK

Requests, approvals, transport catalogs, billing docs are on your laptop.

TRACKING

Managers can check where the employees are and where they go at any moment.

THE DIFFERENCE BETWEEN A TAXI SYSTEM AND GOFER

GOFER

Is designed from its core to optimize and minimize transportation costs for the companies.

TAXI SYSTEMS

Are designed from their core to increase revenues for taxi drivers and operators.

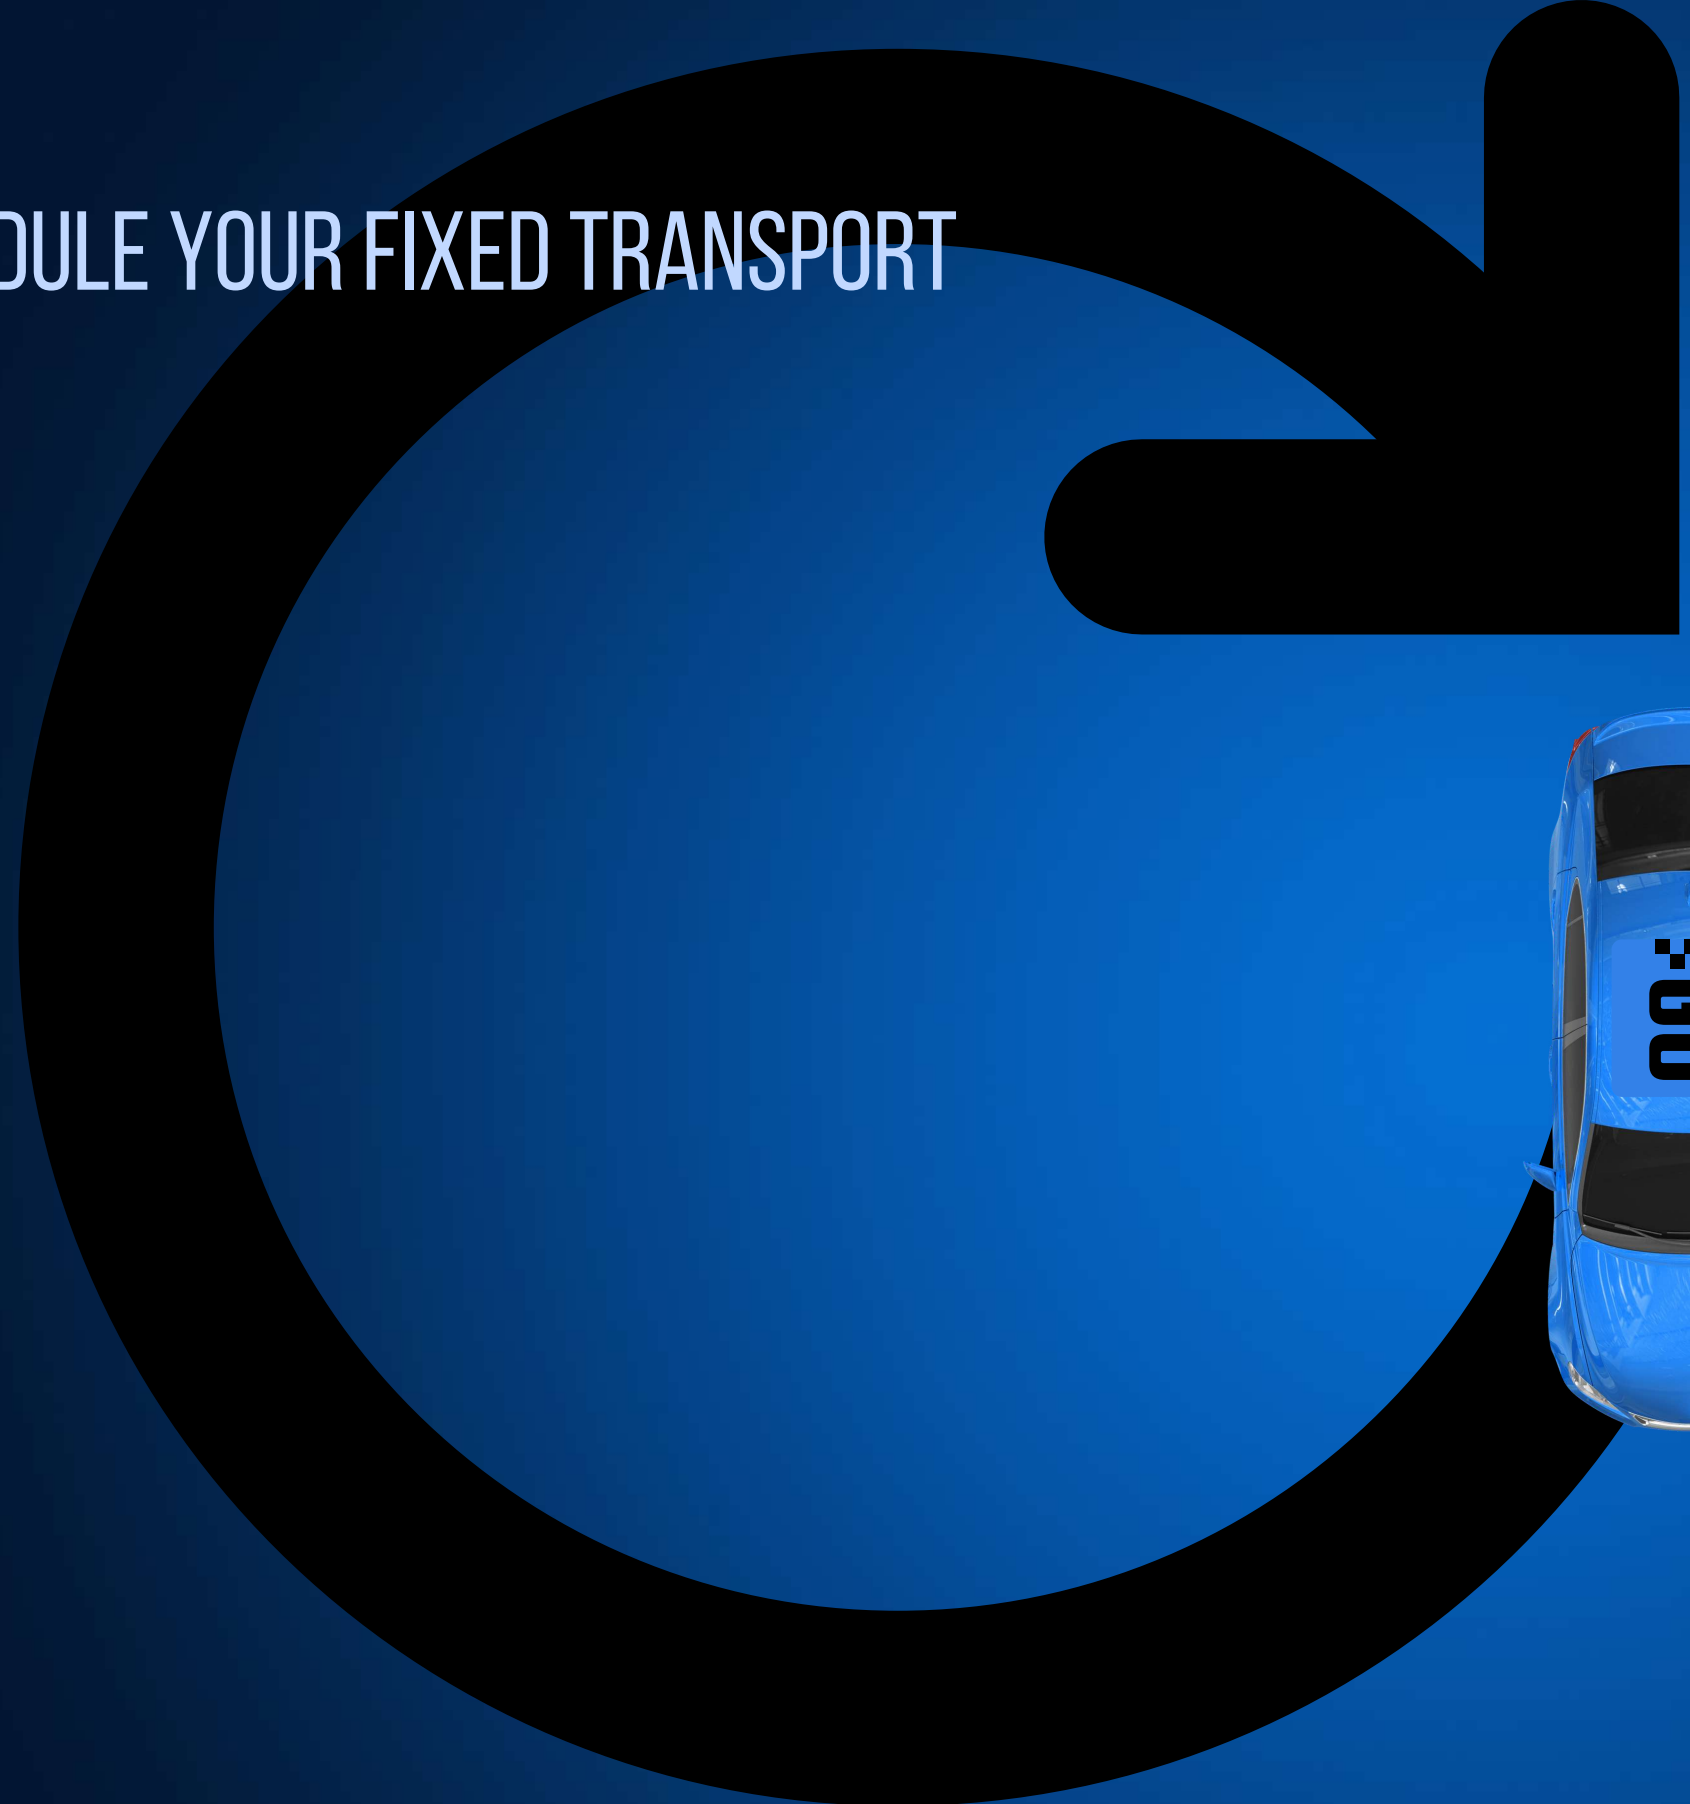

BUILT TO SHARE AND SAVE

MULTI-POINT RIDES

Plan trips with multi-points to pick and drop your team to share the ride.

SCHEDULE YOUR FIXED TRANSPORT

RECURRING RIDES

Schedule your pre-planned daily pickup/drop schedules months ahead. Exclude holidays and the GOFER will dynamically take care of your multi-point fixed rides.

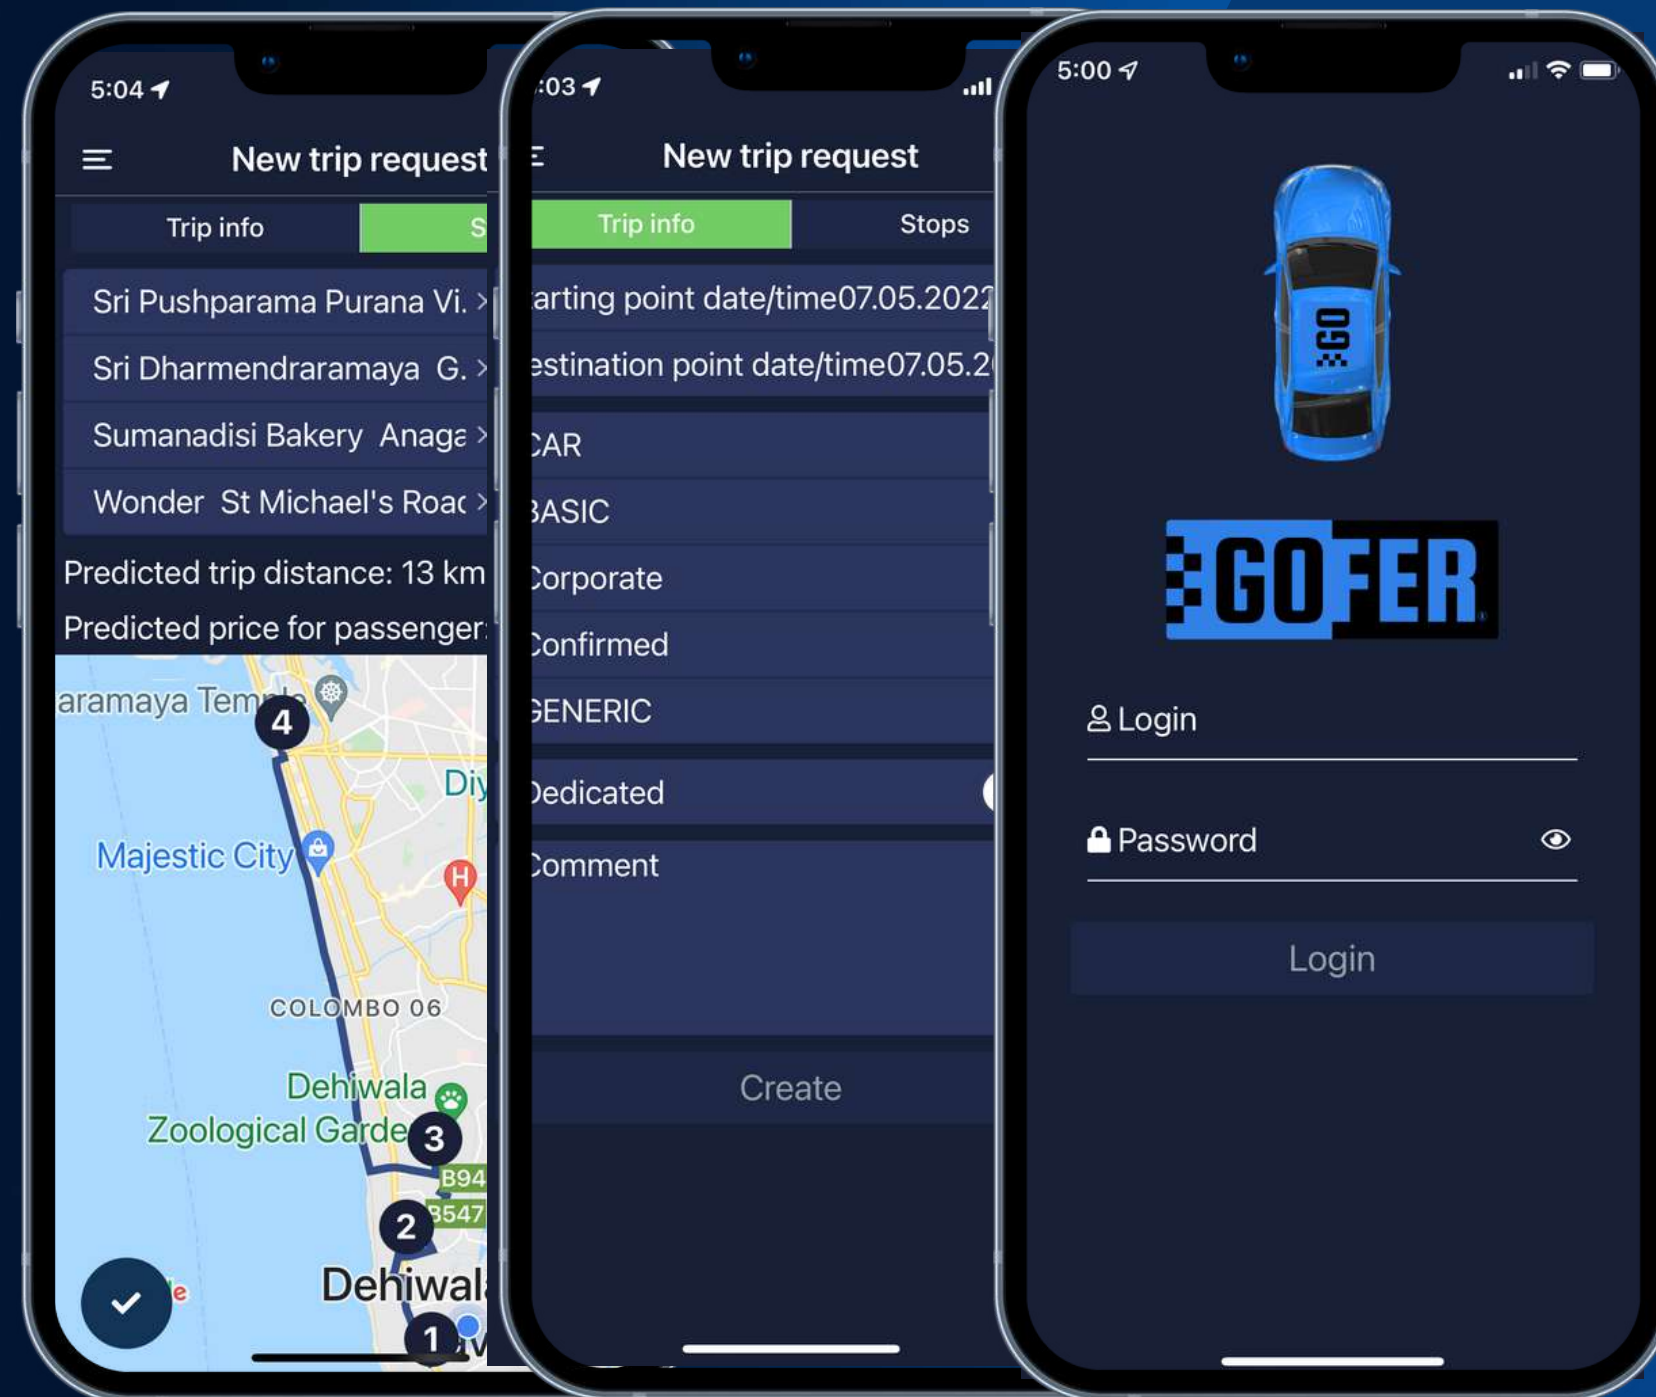

BUDGET VS ACTUALS

BUDGET

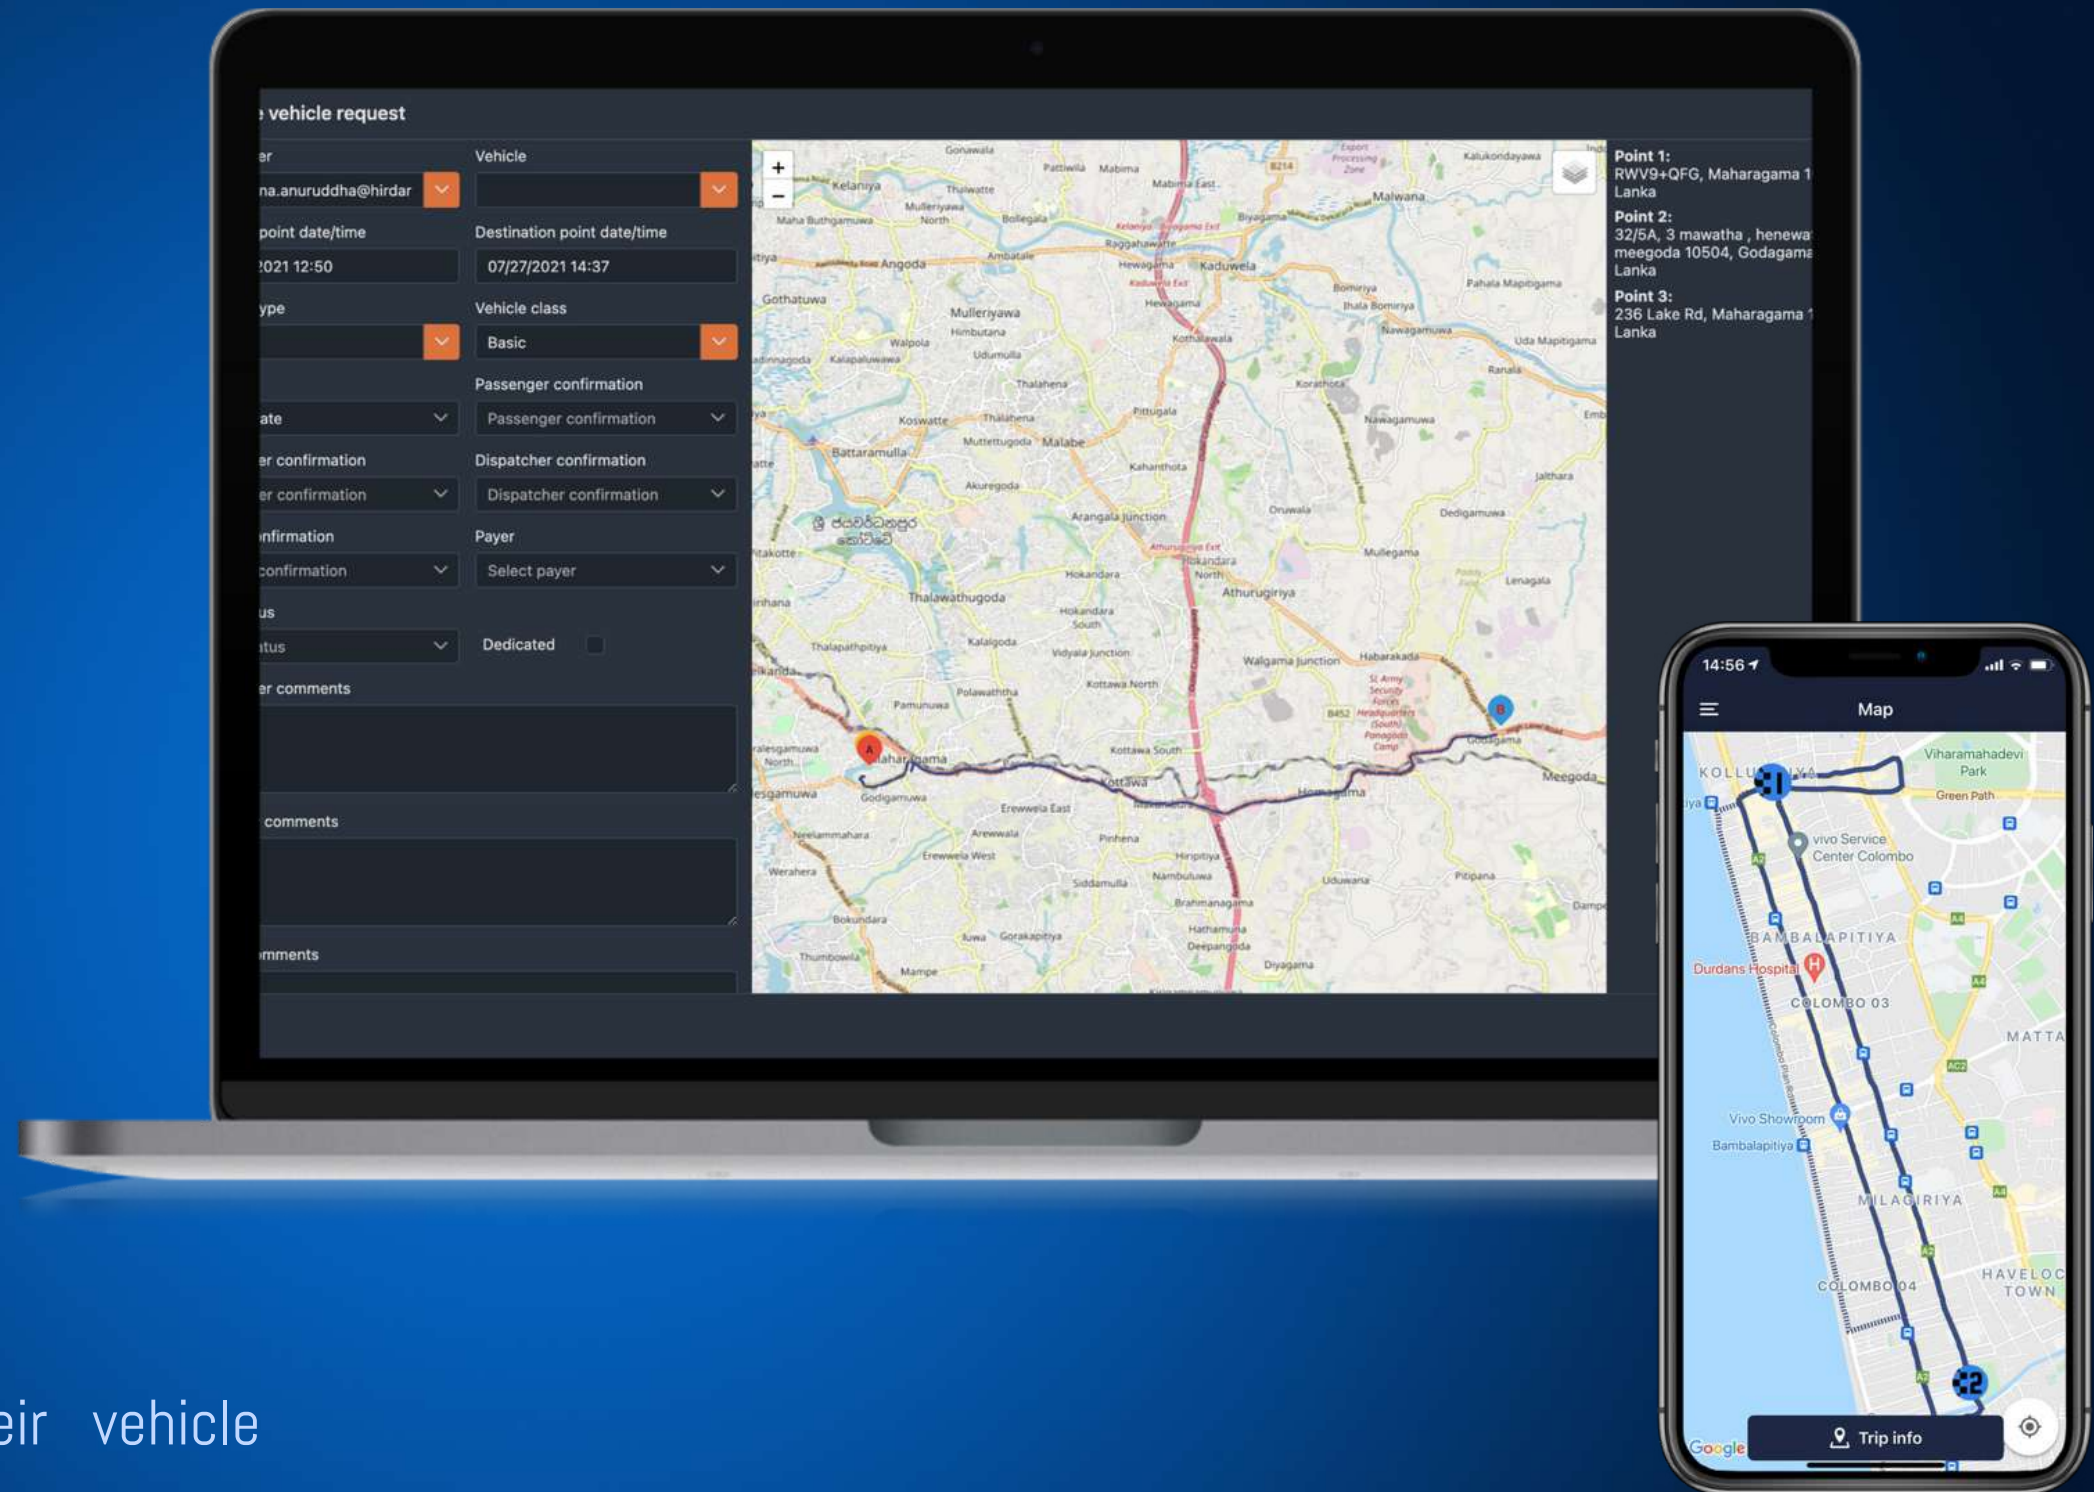

Set budgets department-wise, branch-wise and GOFER will automatically block new requests when the limits are reached.

UNIVERSAL MOBILE APP

ROLE BASED

GOFER's smart app design allows you to be a dispatcher, manager, driver or a passenger by autodetecting your users role. You need not find the app, GOFER app will find you.

PASSENGER REQUESTS

your staff who are passengers make their vehicle requests online for any future date as simple as any app based taxi system. Dispatcher assigns vehicles once the line manager approves the request.

ASSIGNING A DRIVER

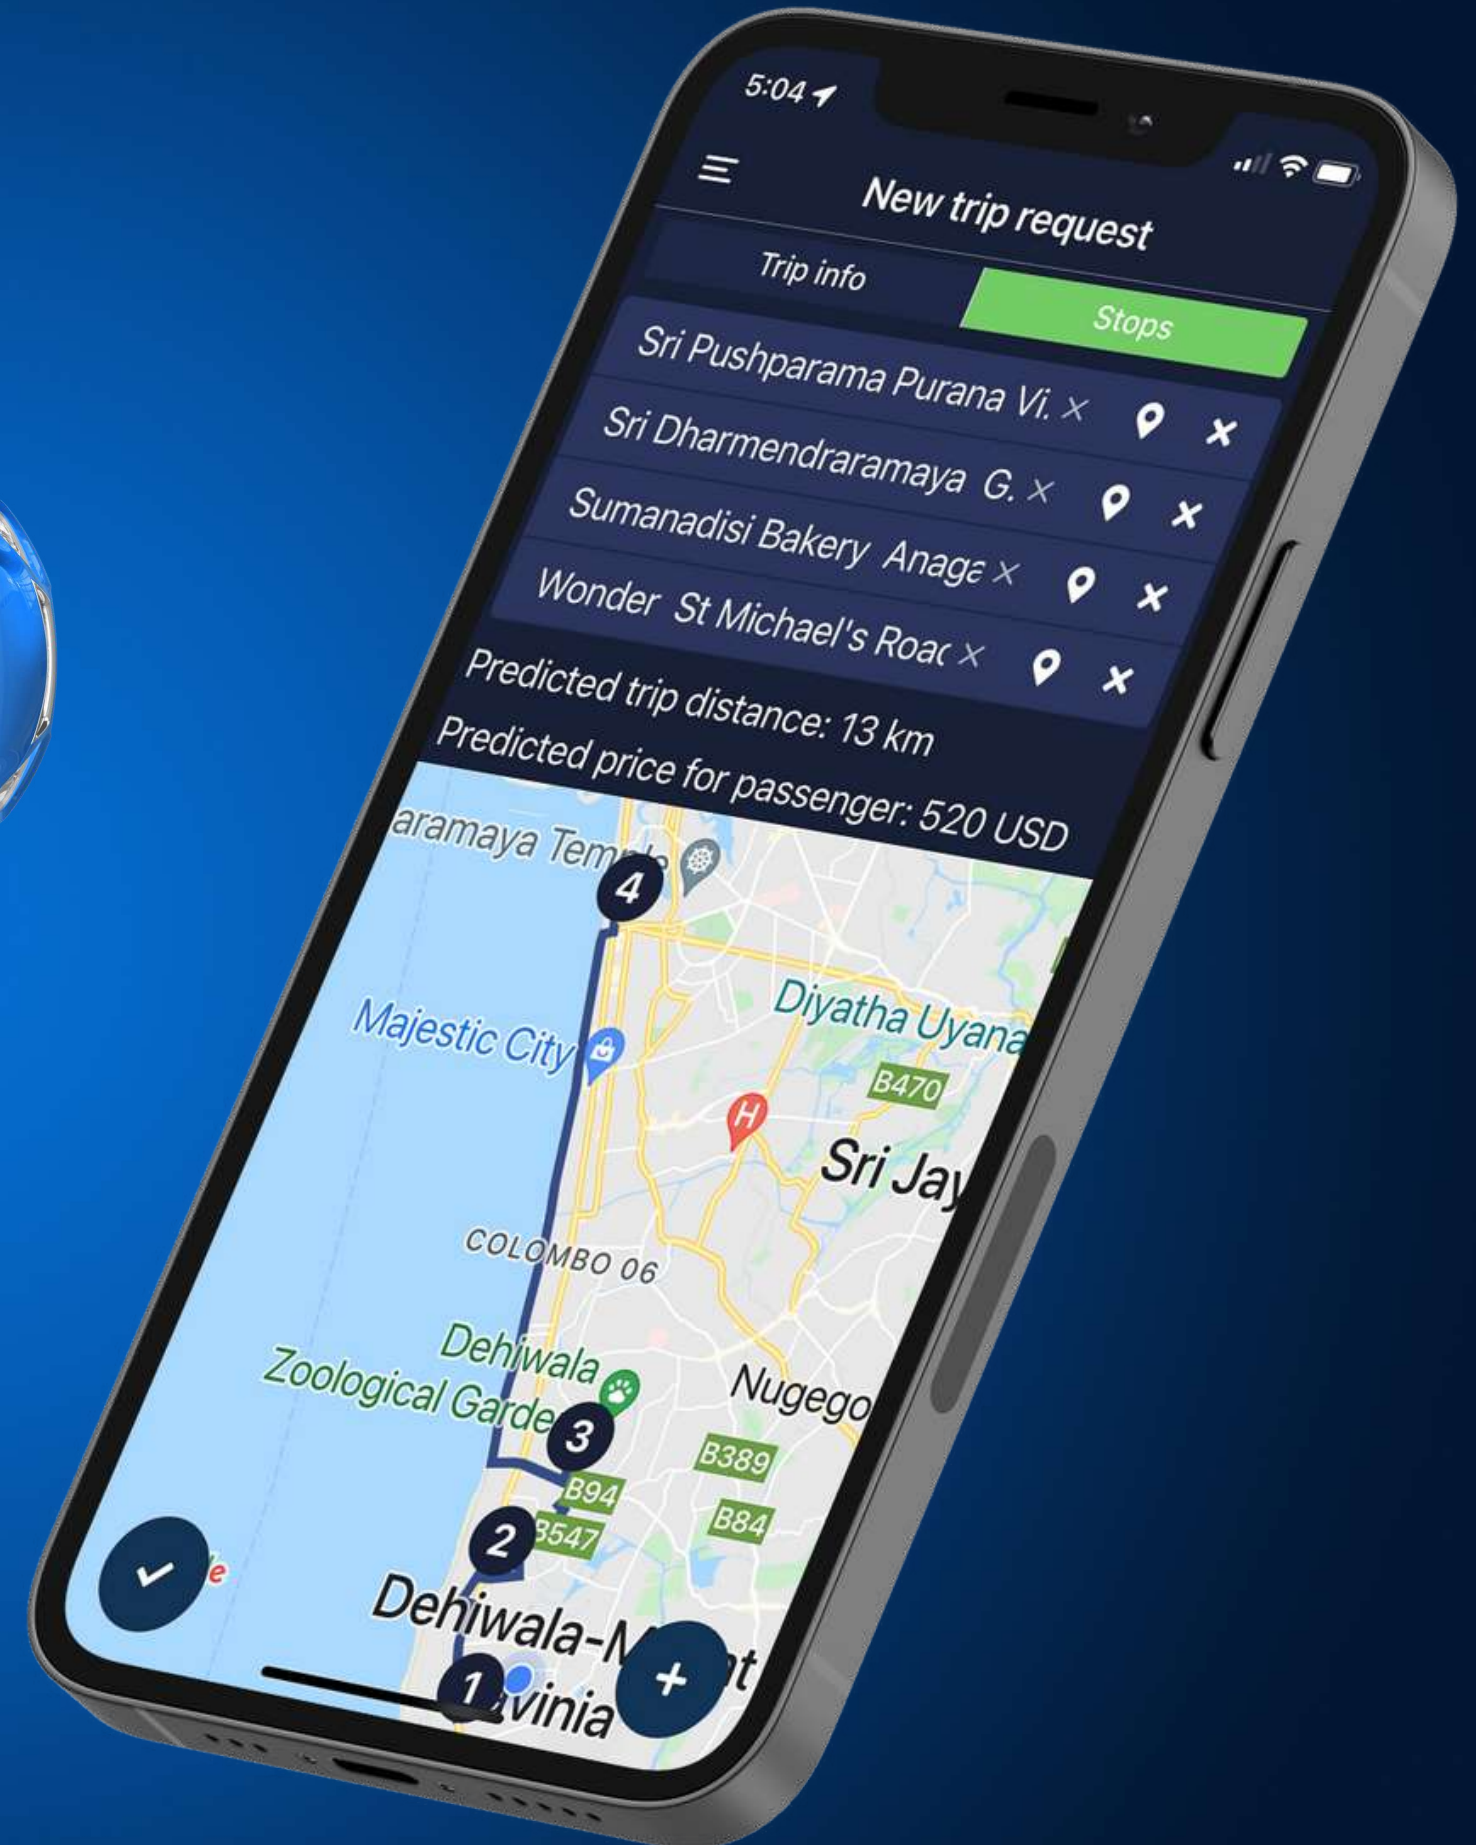

DISPATCHER ASSIGNS VEHICLES

DRIVER ACCEPTS AND COMPLETES TRIPS

DISPATCHER ROLE

When passengers request vehicles and once approved by the line managers (Optional) the dispatcher is notified to assign a vehicle via the driver. Dispatcher role can also trigger single trips and recurring vehicle requests on behalf of company or a passenger.

DASHBOARD AND REPORTS

Select the criteria and the period. GOFER will generate multilayered reports instantly saving days of your transport administration staff's time while leaving no room for human errors.

How is the company fleet used? How many vehicles are available now? How many are on trips? Amount to pay to drivers for a given period of time?
